These folks have asked for a face-to-face with us also. Would we want to do this jointly if you all are already planning on Dan speaking with them next week? Was this scheduled for Monday?

Subject: Bridgeton Landfill - Virbac

Bari Miller of Virbac Animal Health called me this morning. Virbac is located across St. Charles Rock Rd from the landfill north of Hussman. She would like to schedule a meeting between her management and DNR staff. She said that employees at the plant have been asking a lot of questions about what is going on at the landfill and are getting very fearful about the threat from West Lake Landfill (especially lately with the recent news stories). Virbac is the closest business to West Lake. I talked to her for quite a while about the current status of Bridgeton, but told her that she would have to request such a meeting through one of you. She probably will be emailing you concerning this. Her contact info is:
